TRANSCARRY

E70100 & E80120

Our electric transport platform is designed for the daily operations of hotels and resorts: transferring luggage at group and coach check-ins, moving linen and amenities between floors, setting up banquet and conference rooms, and restocking minibars with beverages and supplies. With a powerful traction system and swivel casters, it moves up to 300 kg quickly and quietly through corridors, elevators, and confined spaces, requiring no physical effort from staff.

Technical specifications

- **Dual electric motor:** 2 x 800W (maximum power 2 x 1200W) for optimal performance
- **Batteries:** 2x (48V-8Ah) total 16Ah, optional up to 3 different batteries depending on the required autonomy, maximum 45Ah
- **Integrated charger:** Powered by 220V, easy to plug into any power outlet
- **Adjustable speeds:** 3 forward modes + reverse
- **Dual braking system:** Hydraulic and parking mode for maximum safety
- **Swivel rear wheels:** Offer great maneuverability in tight spaces
- **Load capacity:** Up to 300 kg
- **Display:** Screen for viewing battery level, speed, distance in km, etc.
- **Two different models**
two sizes: 70x100cm and 80x120cm
